**Online Advertising**

Advertising on WorkCompCentral is a proven marketing tool for creating brand awareness, generating sales leads, introducing a product or service, launching a company, expanding, re-branding, differentiating one's products or services from the competition, sponsoring or exhibiting at trade events and maintaining a presence in the marketplace.

Display advertising on WorkCompCentral media is dynamic and measurable. It is priced based on ad size and location.

Display ads (web-ready images) are measured two-dimensionally (height and width) in pixels. The file size of the web-ready ad image is measured in kilobytes.

The objective of online advertising is to generate click-throughs to the advertiser web home page or a target URL (landing page). Every advertiser on WorkCompCentral must have a website or a landing page for their ad campaign.

At the beginning of each month, our advertising clients may request a monthly ad traffic report, detailing the number of ad impressions (views) and click-throughs their ads received from the previous month.
